

CAPACITY BUILDING ADVANCED TRAINING:

Simplified GHG Measurement Tool for Power Generation

Date: 6th August, 2014

Venue: TERI, India Habitat Center, New Delhi

To enhance the robustness of inventorization in the power generation sector and provide a user-friendly approach for estimation of GHG emissions, the India GHG Programme has developed a simplified **“GHG Measurement Tool for Power Generation”**

This dedicated training module will demonstrate the tool and provide hands-on training through exercises and discussions.

The tool would best serve companies engaged in power generation and those owning captive power generation units. We extend invitation to representatives from Environment and Sustainability, Operations, Maintenance, Engineering and R&D departments.

Session Flow

09h00-09h30	Registration	
09h30-10h00	Process of Energy Generation: Types and sources of emissions	CII
10h00-10h30	Recap: Concepts of GHG Accounting	WRI
10h30-11h00	Understanding the Power tool	TERI
Tea Break		
11h15-12h00	Tool Demonstration	TERI
12h00-13h00	Exercises	TERI
Networking Lunch		

We duly acknowledge the support of
